CERTS

Certified Ethical Hacker (NSDC Government Certificate)

Full-Stack Web Development Certification (NSDC)

PROJECTS

Online-Leave-Application   01/2024 -05/2024

Developed a web-based leave management application using React.js, Node.js, and MongoDB. Implemented features including user authentication, leave request submission, approval workflows, and real-time notifications. Enhanced efficiency and streamlined leave management processes.

Technologies Used: React.js, Node.js, MongoDB

Key Features: User authentication, leave request workflows, real-time notifications

Impact: Improved efficiency and user experience in leave management

Anti Phishing and Social Media Security Platform   08/2024 - 05/2025

Built a full-stack solution to combat phishing attacks and enhance social media security. Developed a responsive front-end using [e.g., React.js] and a secure back end with [e.g., Node.js and Express.js]. Implemented features such as real-time threat detection, phishing site identification, and user alerts. Utilized MongoDB for scalable data storage and integrated security protocols to ensure robust protection. The platform successfully increased user awareness and provided effective safeguards against online threats.

Real-time Threat Detection: Implemented features to identify and alert users about phishing threats.

Alerts: Enabled proactive security measures with timely notifications.

VOLUNTEERING

Hakathon co-ordinator and participent

phoneix club ,

Coordinated logistics and managed event scheduling for a 3-day hackathon. Collaborated with z team to plan and non technical activities facilitated communication between participants sponsors and volunteers oversaw registration ensured smooth operation of sessions and handled on site troubleshooting assisted in promoting the event and engaging with participants to enhance their experience
